

Applies picture formatting to data at the FNF level

Features

Performs picture formatting at Field Nominated File level. JetTrac Format™ formats the data, not the field.

Performs global picture formatting. No need to apply picture formatting to all possible fields used in the form.

Used when you cannot turn picture formatting on at a global level. With the picture formatted into the data, the picture still comes through.

Customizable picture formats. JetTrac Format can use your own user-defined formats.

The Company

Pro Technology Automation is an industry leader for developing custom JetForm Central™ solutions. Pro Technology has over six years of experience with hundreds of clients, providing both custom agents and development, consulting, implementation and training for JetForm Central solutions.

Other Products

Pro Technology markets and installs a large variety of its JetTrac™ JetForm Central™ custom agents that give JetForm Central the functionality your business has always needed but lived without until now. Some of the many functions include sorting records, separating documents for different printers, reformatting addresses, reprinting, and more that automate tasks traditionally handled by one or several employees. We can even develop a custom agent specifically for your needs.
