

## **Groups Documents by amount ranges for separate processing and printing**

### **Features**

**Groups documents by specific amount ranges.** Specify any numeric field and JetTrac GroupRange™ automatically groups documents by numeric field ranges, such as check amount.

**Automates high-dollar check printing.** All checks over certain value can be directed to a specific printer with a different form for manual signature.

**Creates a separate output file for each range.** Each document can then be processed by JetForm Central™ separately, for further processing or different printer destinations.

**Allows for a diversity of output options from one print stream.** Each document in the print stream can go to any or all of multiple destinations, such as different printers, fax, print, and E-mail.

**Saves your staff time and energy.** Checks no longer must be manually sifted to pick out large dollar amounts, saving your staff time for what you hired them.

**Cross-platform.** Runs on any server that supports Java, such as NT, UNIX, and AS/400.

### **The Company**

Pro Technology Automation is an industry leader for developing custom JetForm Central™ solutions. Pro Technology has over six years of experience with hundreds of clients, providing both custom agents and development, consulting, implementation and training for JetForm Central solutions.

### **Other Products**

Pro Technology markets and installs a large variety of its JetTrac™ JetForm Central™ custom agents that give JetForm Central the functionality your business has always needed but lived without until now. Some of the many functions include sorting records, separating documents for different printers, reformatting addresses, reprinting, and more that automate tasks traditionally handled by one or several employees. We can even develop a custom agent specifically for your needs.
